

Nurcacit OBSH
Blowing Agent**Technical Data Sheet**

CHEMICAL NAME: 4,4'-oxydibenzenesulfonyl hydrazide

CAS NO.: 80-51-3

Structure:

The product can apply to natural rubber (e.g. EPDM, SBR, CR, FKM, IIR, NBR), synthetic rubber (e.g. PVC, PE, PS, ABS) and thermoplastic products. It's also used for making rubber-resin mixture.

The product has fine insulativity and can be used for making wire and cable. In certain situations, it can be used as foaming agent as well as cross-linking agent in curing mechanism.

This product is the most commonly used foaming agent. It can play its role with other foaming agent. As its wide use, OBSH is also known as universal foaming agent.

PRODUCT SPECIFICATIONS

Appearance:		White powder
Content	(%)min.	98
Decomp. Temp:	(°C)	158-164
Moisture	(%) max.	0.5
PH value		6-8
Gas Delivered:	(ml/g)	125-140
Content	(%)min.	98

PACKAGING:

Carton	25kg	pallet weight: 500kg/pallet
--------	------	-----------------------------

Shelf Life: 24 months under good storage conditions
