

Nurcacit SDBC
Rubber Stabilizer**Technical Data Sheet**

CHEMICAL NAME: Sodium dibutyl dithiocarbamate

CAS NO.: 136-30-1

STRUCTURE

Nurcacit SDBC is an ultra accelerator for NR,SBR,CR and their latexes. It Could as an accelerator when used with Thiurams, Thiazoles and Guanidine in the vulcanization of NR and neoprene latex. SDBC solutions is usable to NR and neoprene latex too, with the beginning curing temperature of 90-100°C. The vulcanized rubber which made of Nurcacit SDBC will been no pollution, no color changed and no smell.

Product Form:	Liquid
PRODUCT SPECIFICATIONS	
Appearance:	Yellow-green to Yellowish brown liquid
Content %	40.0-43.0
Specific gravity at 20 °C	1.070-1.090
PH	9.0-12.0
PACKAGING:	25-200kg plastic drum

Shelf Life: 12 months
