

Nurcagran® 480
Processing Agent
Blend of metal soaps and fatty acid esters

Technical Data Sheet

CORRESPONDING TRADEMARK

Ultralube 480; WA48

PRODUCT DESCRIPTION

Nurcagran® 480 is a highly effective processing additive for specialty polymers. Its unique structure is particularly suitable to improve flow and release of ECO compounds resulting in lower reject rate due to poor hot tear of ECO vulcanizates. Besides it helps in preventing mould fouling. Nurcagran® 480 also works very well to improve extrusion characteristics of NBR/PVC blend compounds.

TYPICAL PROPERTIES

Appearance:	Off white to beige pastilles
Melting point (°C)	85-115
Storage Stability	At least 2 years under normal conditions

DPSAGE

0.5 to 2 phr

PACKAGING

25 kg paper bag with PE-Inlay
